

For more than 100 years, Hillcrest has been a health care leader providing an environment of hope and healing to our patients and their families. During that time, we have developed a full spectrum of services to include advanced cardiovascular and neurological programs, specialized women's health care and innovative approaches to surgery and primary care across northeast Oklahoma.

Oklahoma Heart Institute (OHI)

Oklahoma Heart Institute is a nationally-recognized cardiovascular center with highly trained specialists in all areas of cardiovascular medicine and state-of-the-art technology. OHI is the most-preferred cardiology provider in the Tulsa market.

Transcatheter Aortic Valve Replacement (TAVR)

- OHI has performed more than 500 TAVR cases, a life-saving minimally invasive procedure for patients with aortic stenosis. With TAVR, patients have a shorter recovery time and experience significantly less pain than with open-heart surgery.

Ventricular Assist Device (VAD) and Extracorporeal Membrane Oxygenation (ECMO)

- OHI is the first hospital in northeast Oklahoma to offer the Medtronic HeartWare™ HVAD™ System as a destination therapy option for patients suffering from advanced heart failure who are not candidates for a heart transplant.
- Often used during a VAD procedure, ECMO is for patients who are unresponsive to conventional management and are extremely sick due to acute heart and/or lung failure that is potentially reversible. The ECMO machine helps alleviate the stress on these vital organs.

Minimally Invasive Heart Surgery (MIS)

- In minimally invasive heart surgery (MIS), also known as keyhole surgery, the surgeon performs heart surgery through small incisions without a sternotomy (splitting of the breastbone).

TransCarotid Artery Revascularization (TCAR)

- OHI is the first in Tulsa to offer an innovative new treatment for patients at risk for stroke due to blockages in the neck from carotid artery disease.

CardioMEMS Procedure

- CardioMEMS is the first and only FDA-approved heart failure monitoring device proven to significantly reduce hospital admissions when used by physicians to manage heart failure.

Utica Park Clinic (UPC)

Utica Park Clinic is northeast Oklahoma's premier physician group featuring:

- More than 275 health care providers offering primary care and specialty care
- Over 20 specialties including ear, nose & throat; gastroenterology; obstetrics & gynecology; orthopedics; pain management; general surgery; urology and much more
- More than 75 clinics to provide patient access to quality health care close to home or work
- Same-day primary care appointments
- Virtual care including video visits
- 24/7 access to your personal health information anytime through MyChart

The Center for Bariatrics at Bailey Medical Center

One of the most technologically advanced medical centers in the region, the Center for Bariatrics at Bailey Medical Center offers a patient-centered design, including patient-focused furnishings and equipment.

Bailey Medical Center is a Fully Accredited MBSAQIP (Metabolic and Bariatric Surgery Accredited Quality Improvement Program) by the American Society for Metabolic and Bariatric Surgery (ASMBS) and the American College of Surgeons (ACS).

Peggy V. Helmerich Women's Health Center (PVH)

The Peggy V. Helmerich Women's Health Center was the first facility in Tulsa solely dedicated to women's health services throughout a patient's lifetime. PVH offers a variety of services, including specialized physician care, state-of-the-art technology and service excellence for women, at three convenient locations in Tulsa and Claremore.

Neonatal Intensive Care

- Open pod-style unit, allowing nurses to constantly see patients and remain close in the event that immediate medical assistance is required
- Board-certified neonatologists
- External transport for NICU patients offers a high-frequency oscillating ventilator and whole-body therapeutic cooling capabilities

Women's Features

- Gynecology and gynecologic oncology services
- 3D mammography to detect cancers sooner and reveal more invasive cancers

Birth Care

- Patient-focused amenities including prenatal and birth care education classes, family-centered birthing facilities, lactation program and a high-risk antepartum unit
- Specialists in nursing, obstetrics, perinatology (specialized care for high-risk women who have high-risk pregnancies) and neonatology (specialized care for critically ill or premature babies)

Alexander Burn Center at Hillcrest Medical Center

Alexander Burn Center is Oklahoma's first burn center and has been a regional burn center since 1968. It is one of the most progressive burn centers in the areas of wound care, nutrition and pain management.

Program Features

- Offering comprehensive burn treatment for all types of burns including flame, scald, chemical, steam, electrical and radiation
- Intensive care and a rapid-recovery unit for non-life threatening burns

Oklahoma Stroke & Neurological Institute at Hillcrest

The Oklahoma Stroke & Neurological Institute at Hillcrest is a hub-and-spoke model for stroke and neurological care with two DNV-certified locations in Tulsa. OneCall triage services allow expert physicians to collaborate with regional ER and medical facilities to initiate care during transfers and expedite the care plan before patients even arrive.

Program Features

- Nationally-recognized, board-certified physicians in interventional neurology, neurosurgery, emergency medicine, and physical medicine and rehabilitation
- Dedicated 24/7 OneCall transfer services expedite patients to the appropriate level of care
- Timely testing, assessments and thorough evaluations determine individualized treatment plans

Kaiser Rehabilitation Center

- Serving northeast Oklahoma for more than 40 years
- Ranked in the top 10 percent nationally for the fourth consecutive year for outstanding rehabilitation program performance
- A 32-bed licensed inpatient rehabilitation facility located on the campus of Hillcrest Medical Center and directed by experts in stroke and brain injury

Orthopedic Care at Hillcrest

Utica Park Clinic orthopedic specialists offer comprehensive surgical, rehabilitation and therapy services ranging from spine care and joint replacement to sports medicine and other orthopedic subspecialties.

Key Areas of Focus:

- Care for emergency fractures
- Cervical and spinal fusion
- Cervical discectomy and lumbar laminectomy
- Hip and knee replacement

Advanced Surgical Services at Hillcrest

Hillcrest is a leading provider of premier surgical services through innovative technological advancements and a comprehensive team of board-certified and fellowship-trained surgeons.

Visualase Features:

- MRI-guided laser ablation that precisely targets and destroys unwanted brain tissue with a laser applicator
- Allows minimally-invasive neurosurgical procedures not possible with conventional methods

O-Arm and StealthStation Features:

- Components work together to provide detailed, real-time information to the physician during surgery

Cancer Care Services at Hillcrest

Hillcrest offers a range of oncology services including diagnostic and treatment programs for cancer patients. The programs include medical chemotherapy, radiation and surgery.

Varian Edge Radiosurgery:

- Advanced, more precise, full-body radiosurgery system that preserves healthy tissue surrounding the tumor
- Delivers high doses in a small number of fractions vs. single beam radiation used by competitor technology
